- Slice into a Tray, Tub, Wheeled Cart or onto a Conveyor
- Full Washdown FDA Compliant NSF Certification is available
- 253 - 1,750 00 Slices per minute
- 3 to 25 slices per second available depending most models
- .02" (.25mm) to .375" (8 mm) slice thickness available
- Thickness is product dependent and not achievable on all product types.

Our line of slicers are designed to be dedicated slicing machines which slice at a high rate of speed a very narrow and specific range of product. No single machine can slice every food product ever made. Nowhere on the machine is there a "Magic Slicing Button".

Prior to purchase our customers are required to discuss, in depth, their specific slicing needs with Dx Industrial Slicing professionals in order to choose the best model of slicer for your needs.

We want you satisfied.

All Slicers are Proudly made in the USA
